- \Very poor mock up, I know
- I want a page created something like this with the header and footer. We need a CSS that will define these headers, footers, fonts and sizes.

this is the header and footer.

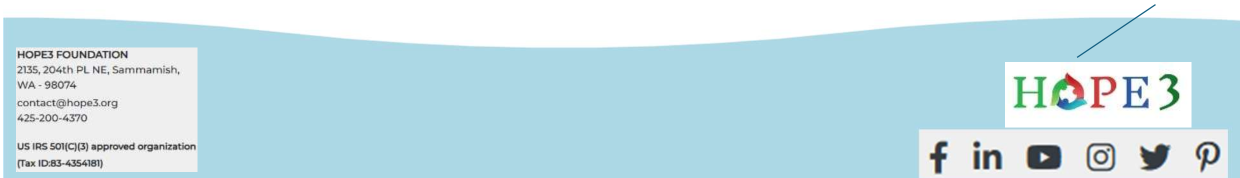

Clicking on this will take them to the home page (https://www.hope3.org

LOGO – same font as whats on the website today with the "3" – tightly packed

OPTION1 for footer

Clicking on this will take them to the home page (https://www.hope3.org

Email should be clickable
Phone number should be clickable

Something like this: but the order is: linkedin, facebook, twitter (but with X symbiol), Instagram, youtube and tik tok (I know it doesn't work in india but others can use it)

OPTION2 for footer

Email should be clickable
Phone number should be clickable

Clicking on this will take them to the home page (https://www.hope3.org

Something like this: ALL on a circle around the logo but the order is: linkedin, facebook, twitter (but with X symbiol), Instagram, youtube and tik tok (I know it doesn't work in india but others can use it)

VERY BAD MOCK UP! I Know

MENU ITEMS ON THE HEADER
